Building a Project MIS with ActivityInfo

Starting shortly, Please wait!
Outline

01 What is an MIS?
02 Introducing ActivityInfo
03 Building the system
What is an MIS?
Management Information System

Process that is…

- Defined
- Repeatable
- Consistent
Management Information System

Provides information required to manage a project
Management Information System

- Improved decision making
- Better resource allocation
- Transparency and accountability
- Better outcomes for project beneficiaries
Improving technology

Decrease reliance on manual (human) processes
Improving technology
Decrease reliance on (human) processes
Improving technology

Decrease reliance on manual processes

Extract and clean

Load into database

Targets
Improving technology
Decrease reliance on manual processes
Improving technology

Decrease reliance on manual processes
What is good MIS?

- Reliable data
- Meets reporting requirements
- Used by management
- Used for learning
Introducing ActivityInfo
ActivityInfo is your **integrated** solution for managing your data across the data lifecycle.
ActivityInfo
An end-to-end solution for data management

Data collection
Easily collect the data you need from anywhere

Data management
Organize your information according to your workflow

Data analysis
Generate actionable insights in real-time
Building an MIS with ActivityInfo
Today’s example

Promoting Pennsylvania Maple Syrup (PAMAS)
What trainings are planned for next week?

Where do I find the farm?

What was the impact of the project?

Are we meeting our targets?

Which training topics led to higher yields?

Indicators for donor?
State → County → City → Farm → Individual → Loan → Training → Annual Farm Survey → Communication → Producer Association
